Excited State Electron Density Differentials: A New Technique for Studying HOMO/LUMO Excitations
B. D. El-Issa, M. A. Makhyoun, and B. A. Salsa' 115

SCF Deformation Densities and Electrostatic Potentials of Purines and Pyrimidines
M. Eisenstein 127

Inclusion of Relativistic Effects into ZDO Methods. II. Solvation of Metal Complexes
R. Boča 159

Announcement 169

Erratum

Calculation of Dipole Moment Changes Due to Peptide Librations in the Dynamic β-Spiral of the Polypentapeptide of Elastin
C. M. Venkatachalam and D. W. Urry 171

Issue No. 3, March 1988

The Energy of the Homogeneous Electron Gas to Second Order
G. S. Handler 173

A Survey of Optimization Procedures for Stable Structures and Transition States
J. D. Head, B. Weiner, and M. C. Zerner 177

Ab Initio Studies on the Catalytic Mechanism of Ester Hydrolysis by Serine Proteases
F. M. L. G. Stamato and O. Tapia 187

A Comparative Study of the Bonding in Different Halides of Iridium
B. D. El-Issa, A. Katrib, R. Ghodsian, B. A. Salsa, and S. H. Addassi 195

Quantum Phenomena in Small Semiconductor Structures and Devices
K.-F. Berggren 217

New Concepts in Bonded Functions Theory II. Canonical Set of High Internal Symmetry
A. Gołębiewski, E. Broctawik, and M. Witko 247

Book Review

Intermediate Physical Chemistry: Stationary Properties of Chemical Systems. By Joseph B. Dence and Dennis J. Diestler
Reviewed by M. A. Natiello 263

Issue No. 4, April 1988

Comparison of the Perdew-Wang Exchange with the Dirac Exchange
P. Csavinszky 265

Variational Energy Derivatives and Perturbation Theory
H. Sellers 271

A Practical Solution to the "Unknown Normalization" Problem
A. Macías, F. Martín, A. Riera, and M. Yáñez 279

Dimensionality Dependence of Total Energy of Closed Shells in a Bare Coulomb Field for Large Atomic Number
N. H. March and J. Cizek 301

Molecular Orbital Calculations on Tumor-inhibitory Nitrosoureas: QSARS
D. F. V. Lewis 305

Correlation Effects at a Local Level and CI Partitions: 2^3S State of Helium
